PHILOSOPHY

About Us

The essential philosophy of DELTA METALLIC centers around recognizing and understanding the needs of our customers, which inspires our continuous development of innovative products that are unique in form and function and are, as a result, highly recognizable and practical.

Delta Metallic Construction Factory L.L.C (DMCF), one of the leading metallic fabrication and coating companies in the U.A.E, was established in 1993. DMCF caters to the industrial services sector, providing steel projects, steel decoration and steel finishing.

Today, DMCF is considered as one of the most important and strategic companies in the UAE in the field of electro-plating. We are able to offer our customers a wide range of finishes and colors – like gold, silver, brass, copper, and royal antique finish – which are normally imported from countries like Germany and the U.S.

All our products, services, and the projects we undertake are controlled and monitored by a highly qualified and experienced management team, technical staff, fabricators, turners, welders, electro-platters, painters, polishers and support personnel, in order to carry out a wide range of steel works at reasonable and competitive prices.

MISSION

Mission & Vision

Mission

To complement and support the ever-growing projects for Steel and stainless steel architecture and design internationally, with special emphasis on the national needs. To continuously invest in infrastructure and technical expertise and be a leader in the industry creating new standards of quality and service to enhance overall growth. We want our customers and employees to be satisfied.

Vision

To be a benchmark of quality in Metals industry and to make Delta Metallic a brand name synonymous to architectural and industrial metal products globally.

Safety Management

Delta Metallic Construction Factory L.L.C has a comprehensive health and safety management system in place to ensure the well being of all our employees. With regards to occupational health, our corporate policy promotes a work place that protectsthe health of DMCF employees, sub-contractors, and the surrounding community. The policy emphasizes prevention, education, voluntary participation, personal responsibility, and cost effectiveness.

The DMCF health and safety management system relies on the implementation of the DMCF health and safety policies. These are collections of policies and proceduresoutlining various safety topics that include the orientation of new employees, the reporting requirements on site.

Health and wellbeing outside the workplace is also and area that DMCF addresses, as we understand the problems it may result in, related but not limited to absenteeism. As a matter of policy therefore, DMCF provides its personnel with various kinds of assistance, such as informational or medical insurance plans, whilst empowering employees to take charge of their personal health.

Line management is responsible for the implementation of health and safety management system, with the support of the personnel department and the assistance of medical professionals as needed. This health and safety management system takes local conditions into account and complies with the health laws and regulations applicable in the UAE.

Quality Assurance

The commitment towards supporting managerial and business operational systems is essential to realizing the qualitypolicy. We believe in the concept of client and supplier working together seamlessly and enjoyably, as we continually strive for improvements in quality of our service. The quality policy is based on 3 fundamental principles. Ensuring that we fully identify and conform to the needs of our customers. Looking at our service provision processes, identifying the potential for errors, and taking the necessary action to eliminate them.

Everyone understanding how to do their job and doing it right the first time round.To ensure that the policy is successfully implemented, staff will be responsible for identifying customer requirements, and ensuring that the correct procedures are followed to meet those requirements.

Objectives needed to ensure that the requirements of this policy are met and that continual improvements are maintained in line with the spirit of the policy, will be set, determined and monitored at Management Review.

The quality policy principles and objectives will be communicated and available to staff at all times. Training will be an integral part of the strategy to achieve the objectives.Within this Policy we are committed to operating our Company under the disciplines planned and developed jointly with our other management functions.

We are all committed to operating continuously to this standard and we will maintain the necessary Quality Approvals consistent with our customer requirements.Our Company will constantly review and improve on our services to ensure tasks are completed in the most cost-effective and timely manner for the benefit of all our customers. We shall ensure that all our personnel understand and fully implement our corporate policies and objectives and are able to perform their duties effectively through an ongoing training and development program.

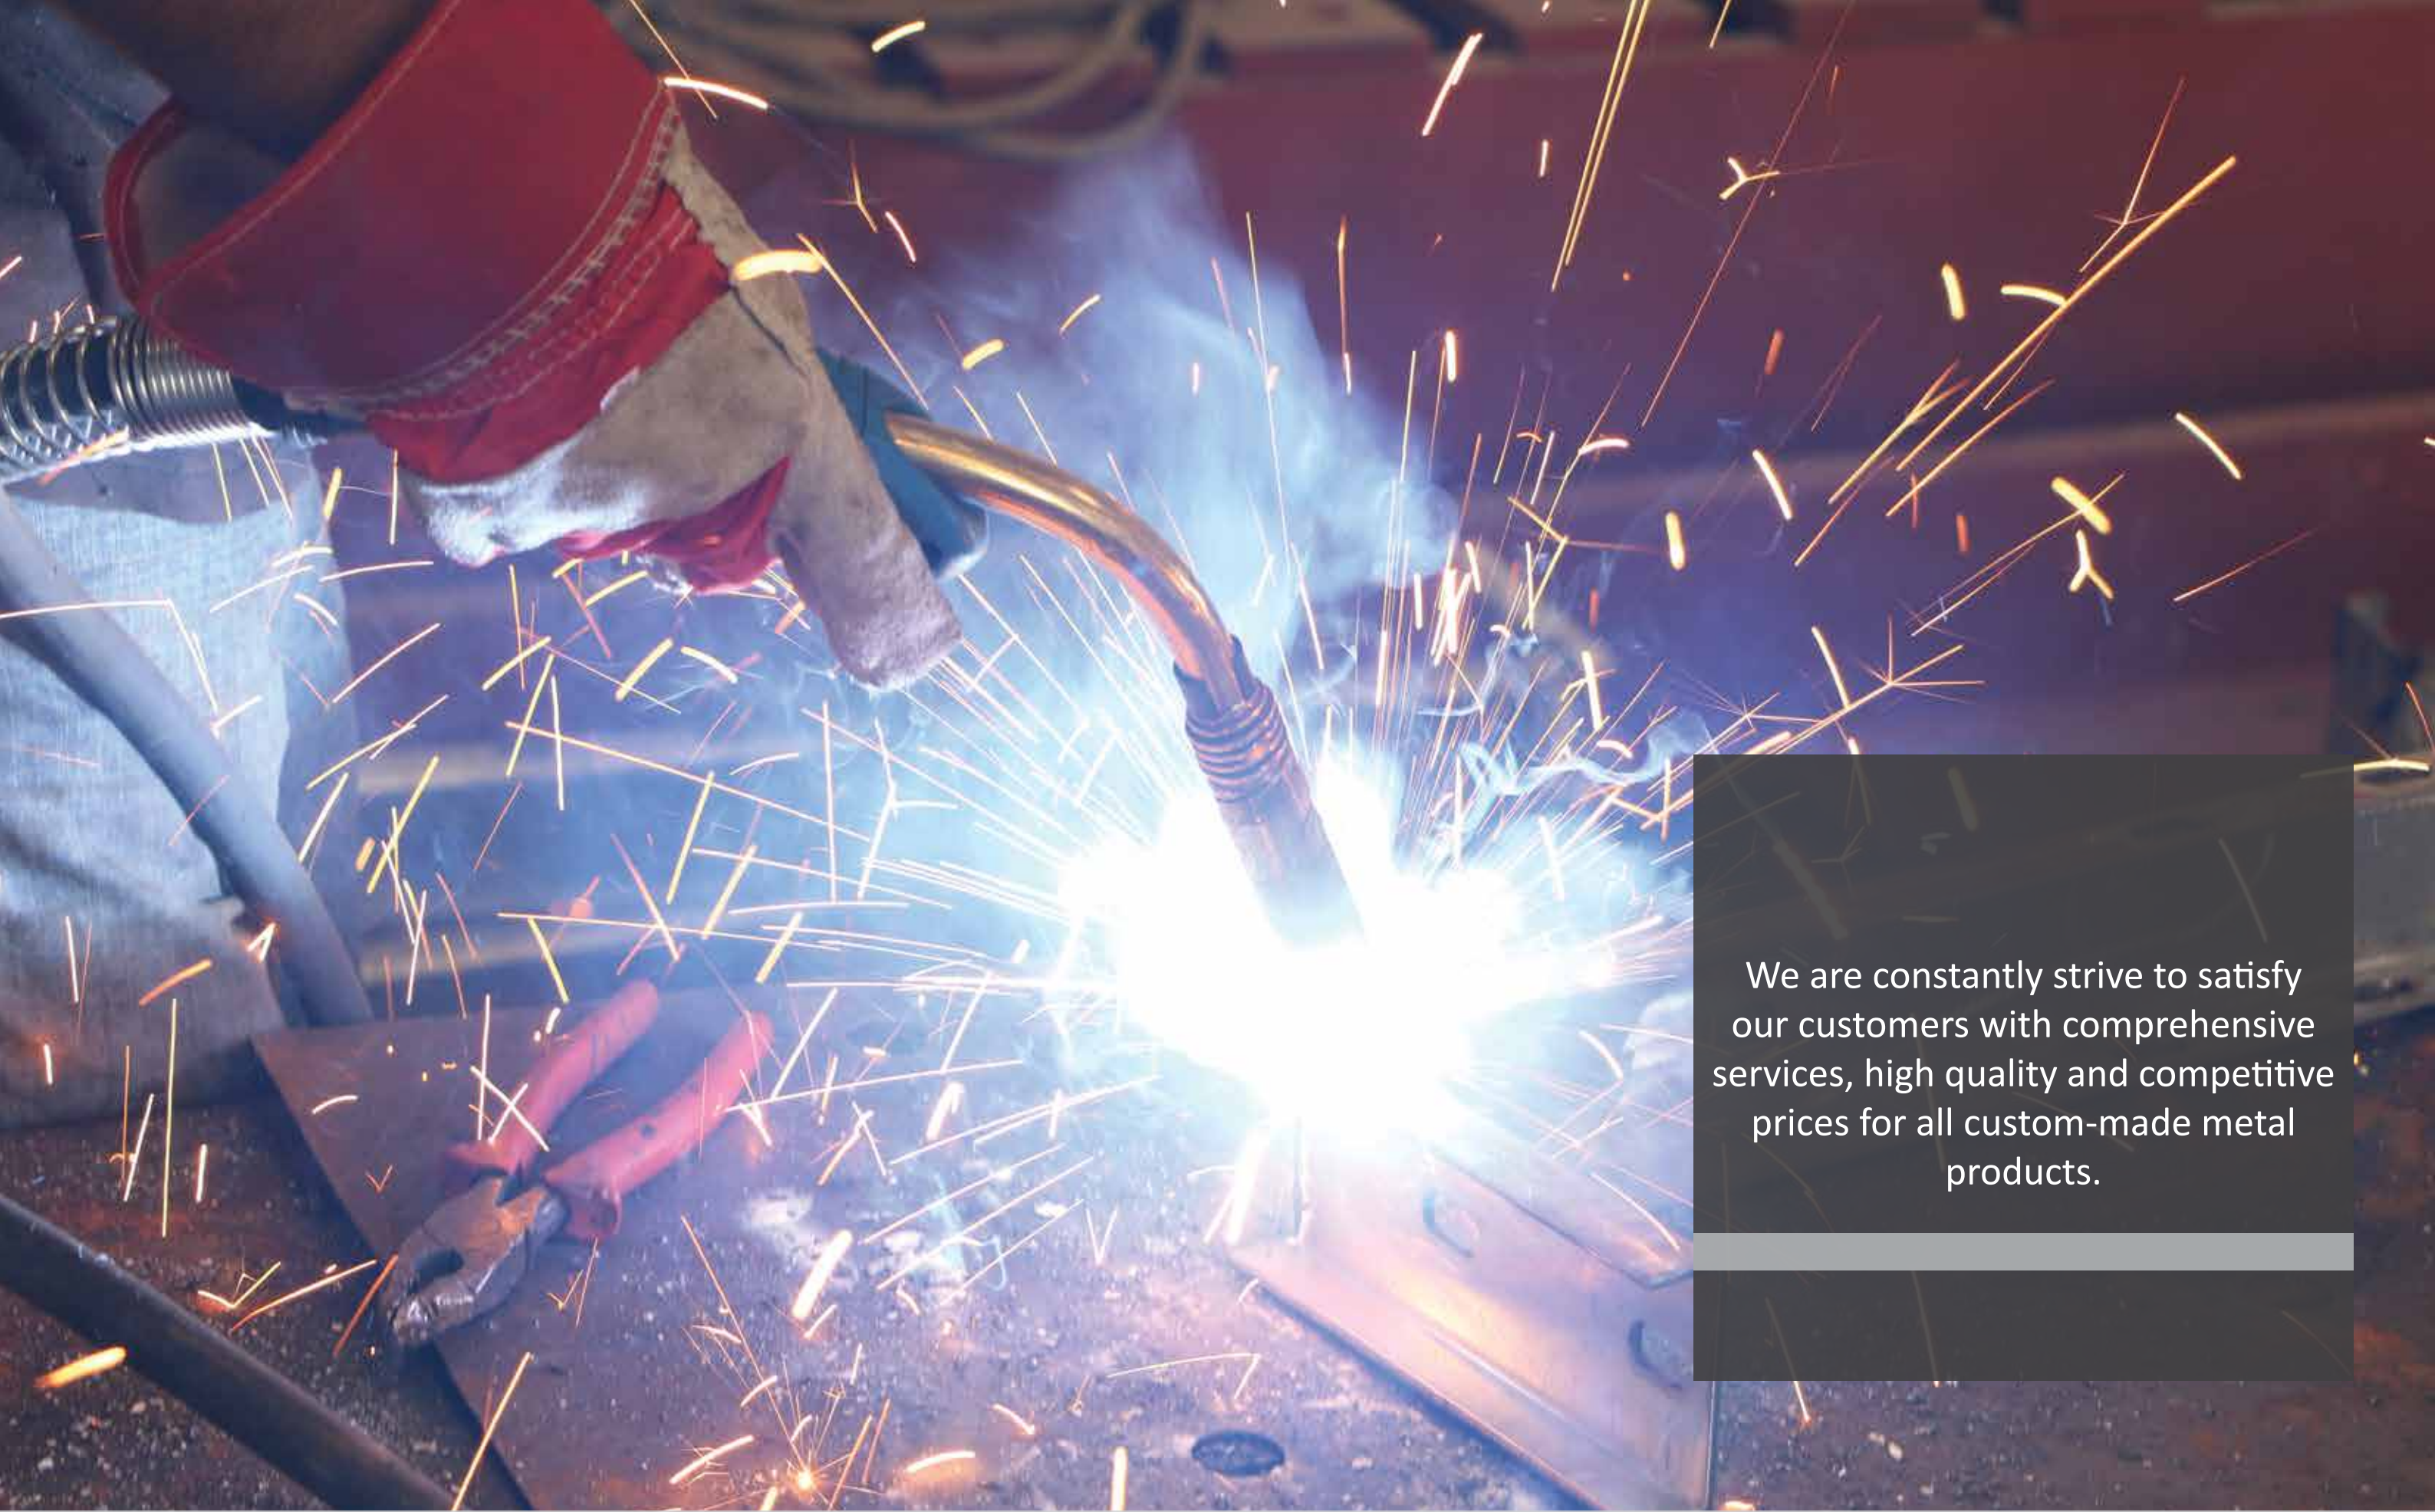

YOUR NEXT LEVEL OF METALLIC FINISH

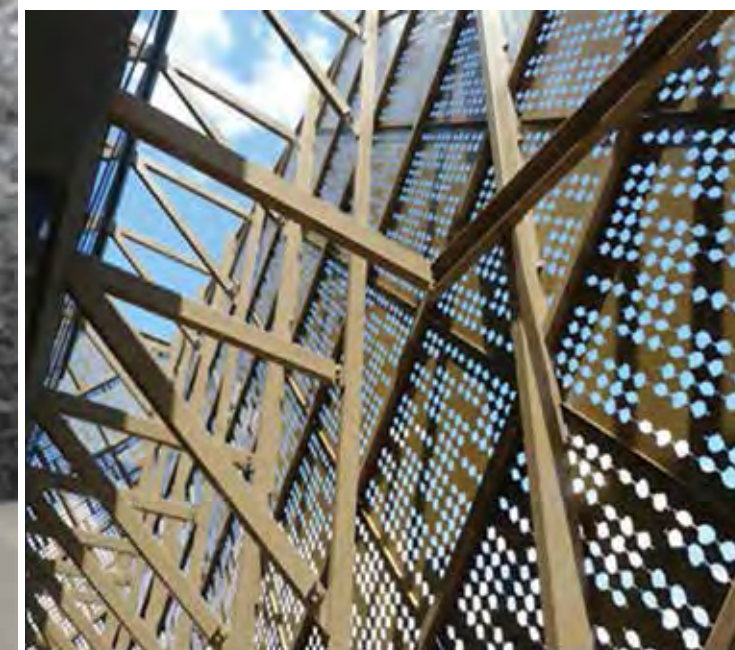

INDEX

Custom Made Products	10-19

Baluster Posts

Delta Metallic presents a full range of uprights for stairs and railings, balusters with glass, ropes or fills in circles or full pipe.

They are prepared for the attack to the floor or to the side connection.

They can also be suitable according to your requests, drilled and tapped or even already fitted with all the accessories for installation.

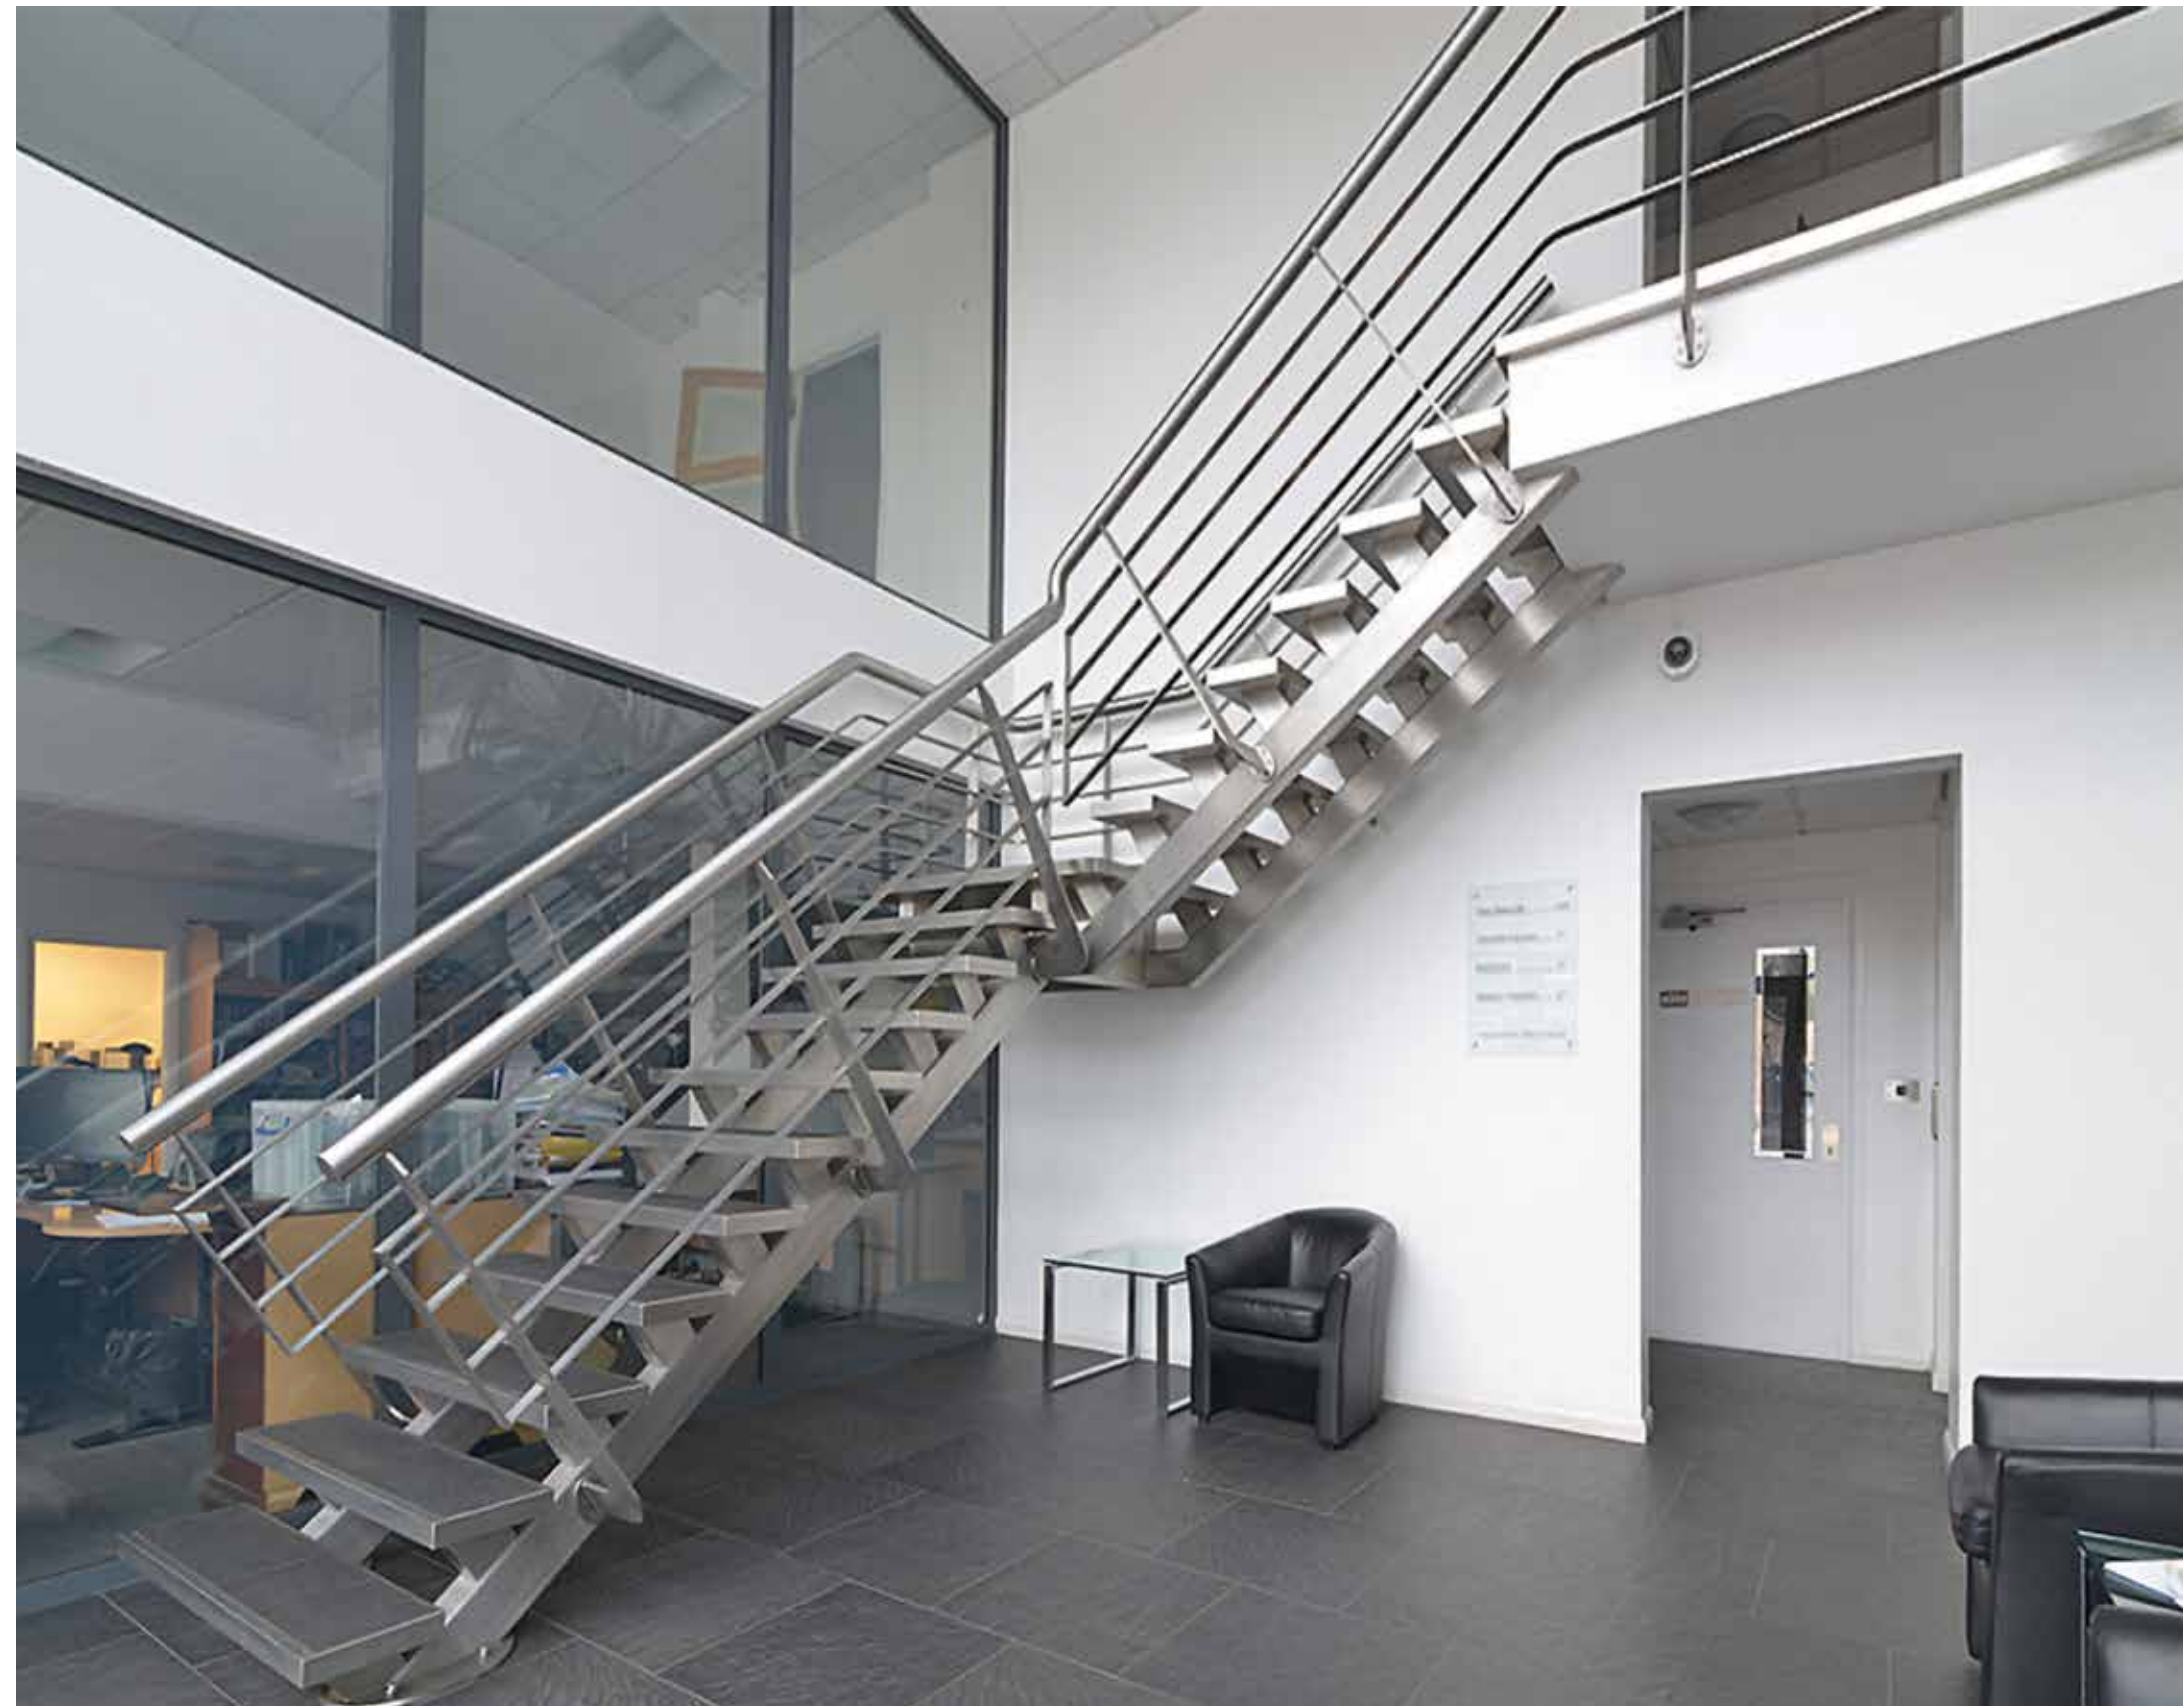

Bending

Our CNC sheet metal bending center allows any sheet-turn machining us precise and perform on time. Through our well-equipped tool storage we are able to respond quickly and flexibly to different customer requirements.

We turn to you with sheet metal parts up to 3000mm in length and up to 10mm thickness.

Polished Surfaces

For our standard products in stainless steel A2 (AISI 304) and A4 (AISI 316),

we provide a grain grinding Finish. At the customer or due to special outer-union events such as Swimming Pool Equipments or in the sea, we also manufacture these products in stainless steel A4 (AISI 316)

Bending Service

With our expertise in technology and design, we realize your Dron, ring and spiral work and assist you in the preparation of projects. The combination of modern machinery and individual attention and competent skilled workers will allow you to give your Wanting designs and ideas an aesthetic form.

Technical Support

Is it special requirements of functional or architectural nature which. By custom or can also be implemented with our standard products, our engineers will be happy to plan your project aside Send us your inquiry and we will find the right solution, at all times to guarantee the optimal design that meets your aesthetic and technical requirements. For assembly operations, our technically trained staff by phone, in the form of an assistant insert to complete installation of your desired project available. All installation work is carried out on schedule and in compliance with all safety regulations.

Simply Glass

The new system simply glass impresses with its straightforwardness and transparency. Thanks to the asymmetric and the resulting, remarkably lightweight design of the profile, good static load values with reduced system weight are extremely feasible.

Due to the reduced weight and associated material savings is simply-glass, despite higher static power, fully priced competition-capable. Practical and quick installation also reduces the use of labor power on the spot and is a guarantee for a flawless result.

Signage is all too often overlooked but critical to the success of any project.

From floor plans Delta Metallic can specify a requirement taking into consideration the needs of those who are unfamiliar with a facility and its surroundings.

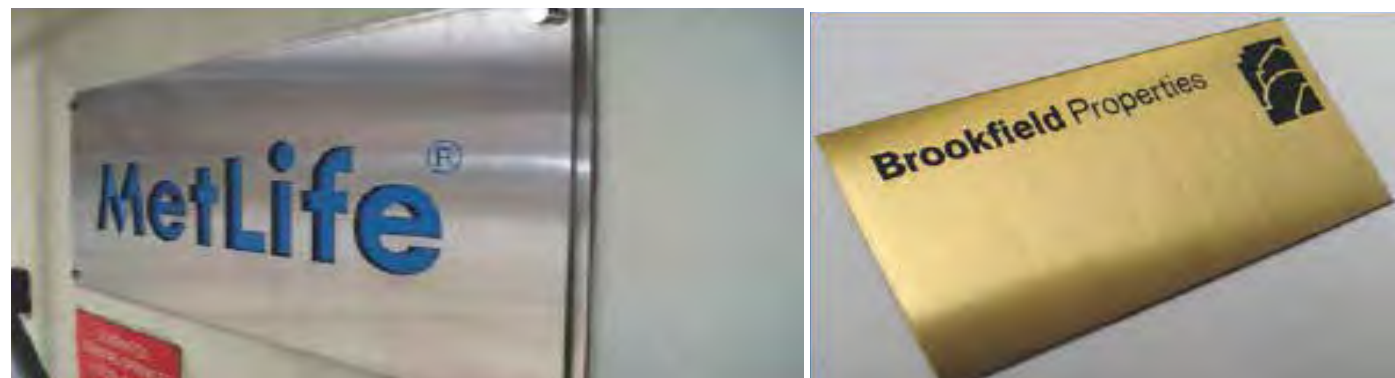

Delta Metallic have, with INTERSIGN compiled suitable ranges to assist in the wayfinding methodology of any building when used by those for the first time.

Access for All should almost certainly start with signage.

Each of our companies works closely with architects, specifiers and contractors offering a full specification, scheduling, estimating, contracts management and delivery service.

Corporate Social Responsibility

Delta Metallic recognises the importance of conducting its business in a socially responsible manner. This is demonstrated in the way we deal with our employees, customers, suppliers and the communities in which we do business. We consider that corporate social responsibility is an integral element of good business management.

INTERSIGN can offer a wide range of sign solutions, set out below is an example of common types.

For more information on a bespoke sign package please contact us.

Pictogram 76 mm dia drilled and countersunk or self adhesive fixed.

- IS 101** Male.
- IS 102** Female.
- IS 103** Unisex.
- IS 104** Accessible.
- IS 105** Baby change.
- IS 106** Shower.
- IS 107** Telephone.
- IS 101a** Pictograms also

IS108 available 150 x 100mm.

Tactile and Braille signage.

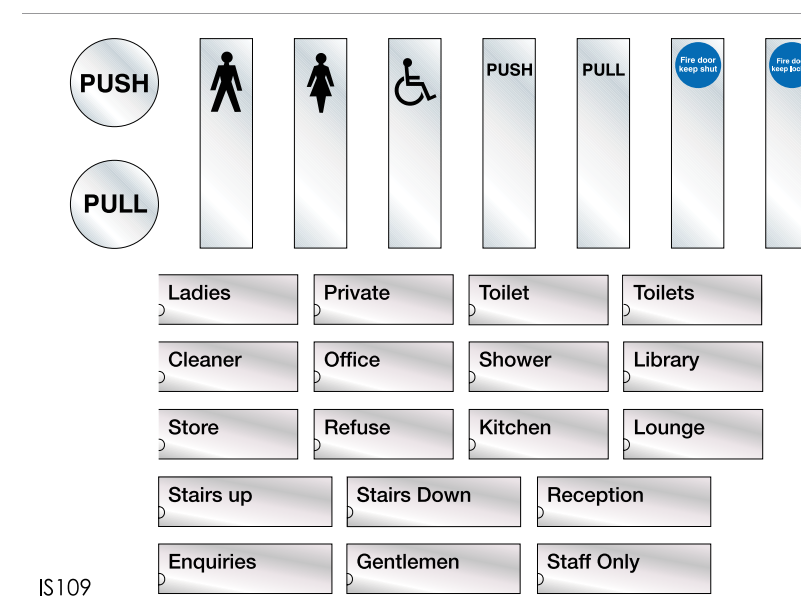

All our tactile and Braille signs are manufactured with the guidance of the Royal National Institute for the Blind to ensure they conform to the recommendations of the Equality Act.2010

We supply Grade 1 Braille for short word signs or Grade 2 Braille) which is a contracted form (for longer sentence signs. The system we use enables us to supply tactile and Braille signs in any metal finish, such as aluminium, stainless steel or polished brass, as well as any colour plastic. This proves beneficial when there is a need to match existing door furniture.

IS109 Architectural signs and nameplates.

INTERSIGN can provide a range of standard and bespoke signs to complement all of our suites of door ironmongery in a wide range of colour and metal finishes. This signage is also available in Braille and tactile formats.

Please contact us for exact size

IS109

CADIC interchangeable signs.
5mm thick, silicon acrylic signs with
face plates to match any door ironmongery.

Supplied with stand-off sign supports,
silicon acrylic has a light green tint around
the polished edges to give a glass appearance.
If a door number or name requires changing,
only the face plate has to be replaced.

Standard Sizes

Numbers and Name Plates

- CAD01 86mm x 56mm
- CAD02 166mm x 56mm
- CAD03 246mm x 56mm
- CAD04 326mm x 56mm

Directories

- CAD05 426mm x 116mm
- CAD06 426mm x 166mm

Standard Finishes

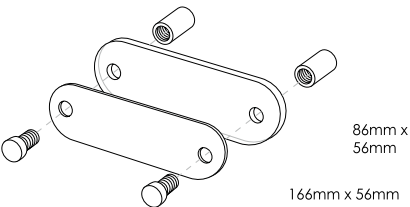

Back Plates
5mm silicon acrylic

Face Plates

Icons are graphic images used to convey a message. The benefits of using icons are that they are easy to understand, are cross-cultural, and are not limited by language.

General icons include a number of universal images such as the No Smoking, Handicapped and Restroom symbols. Icons, as the name implies, are generic and can be used in any location.

Subject : **LETTER OF APPRECIATION**

Dear Sir,

We take this opportunity to express our appreciation of your efforts in assisting us in what has been a challenging project to all.

In particular we note that your team has continually assisted and cooperated in solving the vast amount of technical problems that we have faced.

We further comment that your team has shown professionalism and diligence which has helped us deliver this project to the satisfaction of our Client, CBI, UAB & AL ARAB.

It has been a pleasure working with you and we look forward to working with you again on our further endeavors.

Yours faithfully,

Raed Mikail
